

Recognition of vocational education and training for „Technical Presentation“

Education and training as part of

- a study program at a university or university of applied sciences
- a vocational training as an engineering draftsmen

may be recognized upon presentation of relevant proof, given that content and scope correspond by and large to the course “Technical Presentation”.

Considering the aforementioned conditions, the grade quoted in the proof to be presented is taken as a basis for the grade in “Technical Presentation”.

If you have any questions, please contact Dr.-Ing. Vera Denzer.
